(54) BATTERY WELDER

(57) Abstract:

PURPOSE: To provide a battery welder by which maintenance and inspection such as refilling of a battery liquid are easily and quickly carried out.

CONSTITUTION: A holder 5 is stored in a state capable of taking in and out of the battery case 2 on which a welder part 3 is mounted. In the holder 5, batteries 4 are contained, and these batteries 4 are connected to the side of the welder part 3 via a cable. Necessary maintenance such as refilling of the battery liquid for the batteries 4 may be performed by taking the holder 5 out of the battery case 2. In taking out the holder 5, an engaging piece 5A provided in the holder 5 is engaged with a stopper 2B provided on the side of the battery case 2, and consequently, falling of the holder 5 is prevented.
